PROFILE

Applied AI & Fullstack Engineer with hands-on experience building AI-powered business systems, workflow orchestration platforms, and scalable web applications. Experienced in integrating LLMs, RAG pipelines, OCR, Speech-to-Text, anomaly detection, and AI-driven analytics into production environments. Strong focus on AI systems engineering, automation workflows, reusable AI infrastructure, and practical AI implementation for business operations.

EXPERIENCE

04/2025 - Present
Pontianak, Indonesia

Full Stack Web Developer PT. Sabang Digital Indonesia

- Built **AI-powered business insight and decision support systems** for F&B operations, combining **statistical analysis, anomaly detection, rule-based insights**, and **LLM-generated recommendations**.
- Developed "BangAI", an **AI-assisted analytics** feature integrating contextual business chat, sales analysis, operational insights, and action recommendations.
- Designed **reusable AI microservices architecture** supporting **OCR, Speech-to-Text, queues, background tasks, structured AI outputs**, and **centralized multi-project AI integration**.
- Developed **customer feedback and review analysis pipelines** using Google Maps scraping, NLP preprocessing, embeddings, and clustering approaches.
- Conducted **research and experimentation** on **LLM fine-tuning, RAG architecture, LoRA adaptation**, and **AI workflow orchestration**.
- Contributed to **production-scale platform** enhancement, feature development, bug fixing, and performance improvements for F&B systems.

09/2023 - 03/2025
Pontianak, Indonesia

Full Stack Web Developer Freelance

- Developed a **web monitoring system (MRT)** to track the installation of **PLN** technician equipment.
- Developed **Tekken-API** that is used to assist **Tekken 8 Community** in making combo notation into images integrated with **discord bot**.
- Built **TigeWeb's** website that is used to display the service **Pricelist** and **Portfolio** of **TigeWeb** and became a **Fullstack Web Developer** on a Freelance basis at TigeWeb to work on various projects.

12/2022 - 08/2023
Pontianak, Indonesia

Intern IdeKite Indonesia

- Supervised and assisted **5 team members** in building web applications using **vanilla PHP** technology in web application development.
- Create **Data Flow Diagrams (DFD)** and **flowcharts** to simplify the system development process.
- Play a role in making direct **presentations** to clients.

EDUCATION

2023 - Now
Pontianak, Indonesia

Informatics Engineering Politeknik Negeri Pontianak

2020 - 2023
Pontianak, Indonesia

Computer and Network Engineering SMK Negeri 4 Pontianak

SELECTED PROJECT

 **BangTalent**

AI-assisted recruitment platform with dynamic interview generation, Speech-to-Text workflows, contextual candidate evaluation, and scalable AI-assisted recruitment systems.

 **AI Microservices Platform**

Reusable AI microservices architecture supporting **OCR, STT, queue systems, background processing**, and **custom structured outputs**, while building a centralized AI service infrastructure to enable scalable multi-project AI integration.

 **Customer Feedback Classification Research**

Sentiment and topic classification pipeline using Qwen, IndoBERT, embeddings, and HDBSCAN, while applying hybrid NLP approaches for feedback analysis and clustering.

 **Agent Workflow**

Designed and developed agent-workflow, a multi-agent coding framework focused on delegated code exploration, multi-provider integration, and token-usage tracking for efficient context management.

SKILLS

Python	FastAPI	Laravel	React.js	Javascript	Docker	MySQL	PostgreSQL	REST API	LLM	RAG
NLP Pipeline	Feature Engineering	Data Processing	YOLO Finetuning	HuggingFace	TensorFlow	OCR	Speech-to-Text
